arrange.vinksgoyal.me

- Built a client-side web app that automatically arranges multiple images onto print-ready A4 PDF pages, preserving original quality and aspect ratio with no cropping or stretching.
- Designed an intelligent auto-layout engine that maximizes paper usage across multi-page PDFs without manual resizing or alignment.
- Implemented drag-and-drop image uploads with React Dropzone and fully client-side PDF generation, ensuring user images never leave the device.
- Delivered a fast, responsive, and minimal interface aimed at simplifying a workflow students previously handled manually in Canva, Word, or PowerPoint.

ENGINEERING EXPERIENCE

Founder | Zinux Platforms Jan 2025 – Present · 1 yr 7 mos

- Registered Zinux Platforms and filed trademark; currently building and shipping production-ready web applications independently from design to deployment.
- Developed Python-based productivity tools with analytics and integrated AI workflows into the development pipeline using modern LLM APIs.

Self-Taught Full Stack Developer 2018 – Present · 8 yrs 7 mos

- Built foundations from Linux systems administration (Arch Linux, SSH, firewalls, cron jobs) through shell scripting, server management, and open-source contributions.
- Released GNOME Theme Script that scaled to 200+ users; built automation pipelines and responsive web projects progressing from HTML/CSS to full-stack React and Node.js apps.
- Independently mastered Java, JavaScript, TypeScript, Python, React, Next.js, and cloud deployment — shipping multiple full-stack applications with Firebase, Supabase, and MongoDB backends.
